

Santa Ana Wind Event

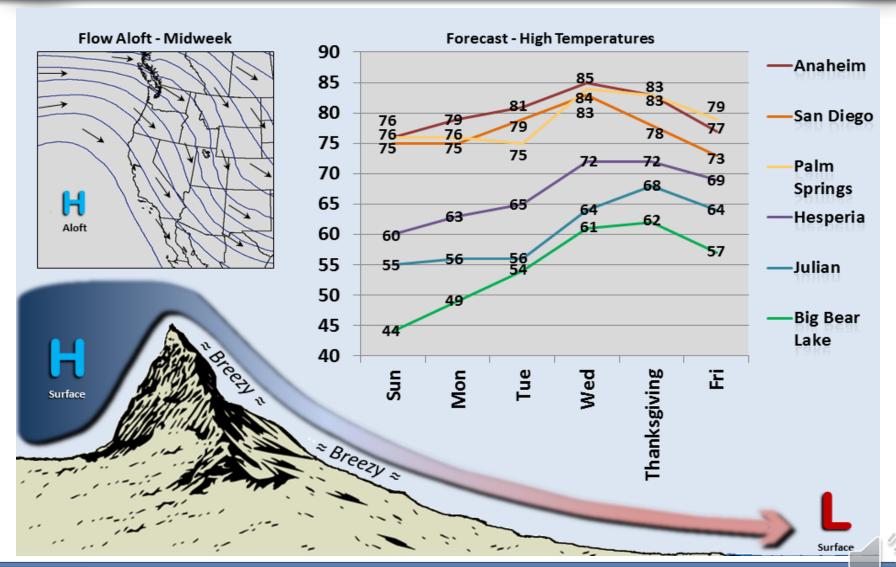

Event continues through Wednesday

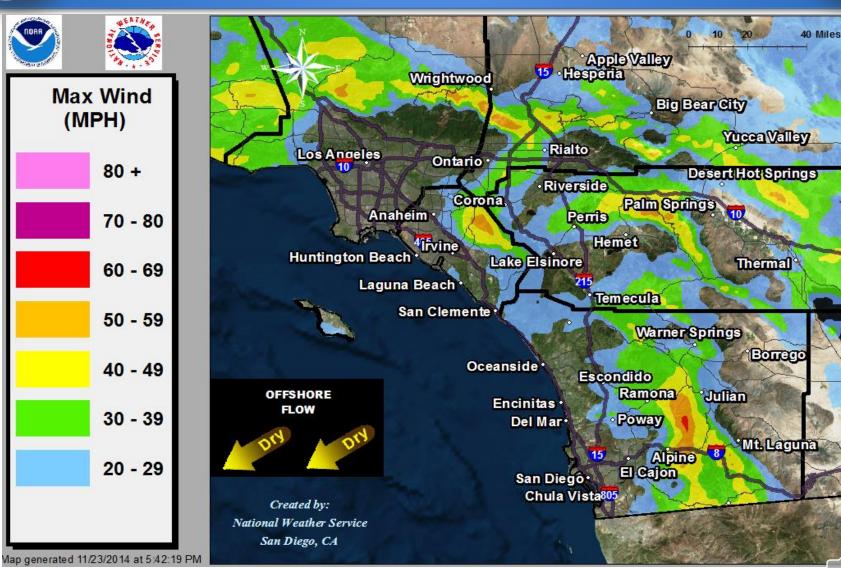

Very Warm, Windy & Dry This Week

Peak Winds thru Monday Eve

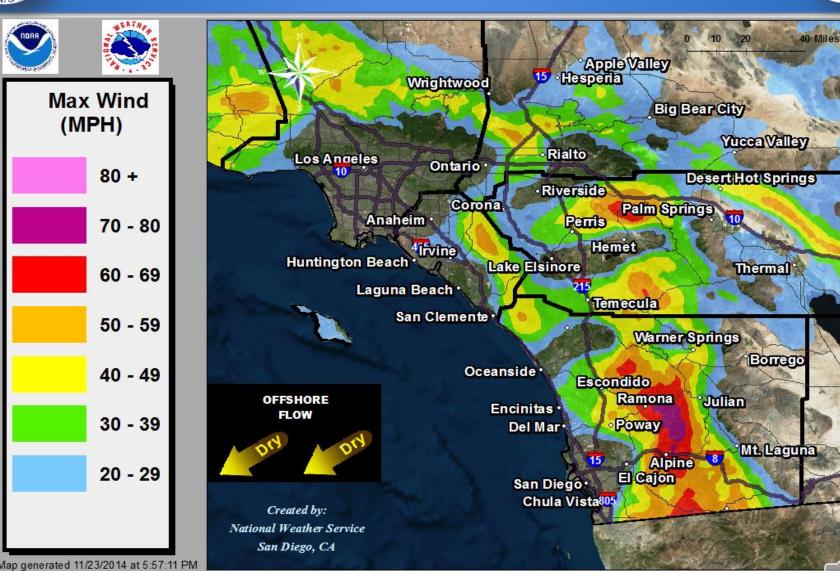

Peak Winds Mon Night – Tue Eve

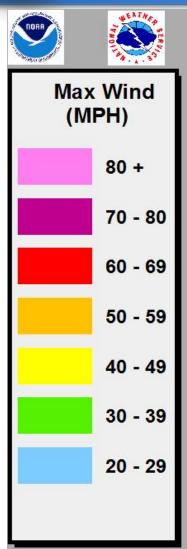

(the strongest winds will occur during this period)

Peak Winds Tue Night – Wed Eve

Tap generated 11/23/2014 at 6:06:08 PM

Summary – Impacts

- Strong winds could cause isolated damage (trees, powerlines, property) in mountain communities
- Blowing dust and low visibility possible in the deserts
- > Travel will be difficult for high profile vehicles, especially in cross-winds
- Very low humidity combined with strong winds will create extreme fire behavior
